

"Space and light and order. Those are things that men need just as much as they need bread and a place to sleep."

-Le Corbusier

Principal Profile

Ron Neal, IALD, IESNA Principal and Founder

Ron Neal has been given the gift of visualization. He can see finished spaces in his head, record them, and work backwards from the vision to concept. Ron's background and experience in architecture and interior design help him see the components and details of the structures that he works with. By understanding these elements, Ron is better able to interpret the needs and desires of his clients and others on the design team.

Experience

Ron has over 23 years of experience as a design professional. He has designed lighting systems for a diverse collection of environments including: luxury residences, restaurants, hotels, corporate centers, museums, theaters, art galleries, healthcare facilities, sporting facilities, retail, schools, historic restoration, and public landscapes.

Ron also has estimating and project management experience in commercial electrical contracting. Ron's father, Tom Neal, founded Neal Electric, one of California's largest, most successful electrical contracting companies. While working at Neal Electric, Ron was responsible for a wide range of large-scale projects.

Ron prides himself on having a key understanding of the important relationship between design and construction. His ability to manage a project from its inception through the final punch list ensures the successful completion of even the most developed and technical lighting design concepts.

Ron's knowledge and experience with a wide range of architectural styles, lighting applications, and construction methods allows him to develop many different custom lighting details which can be integrated into the architecture while enhancing the illumination of the structure, space, objects or finishes.

Lighting Design Associations

Ron is a member of the International Association of Lighting Designers (IALD) and Illuminating Engineers Society of North America (IESNA). He has served on the board of the San Diego chapter of the IESNA. Ron also provides lighting education services to the San Diego design community and has lectured at the San Diego campus of the New School of Architecture, and The Design Institute.

Ron Neal's Education:

Ron graduated from Woodbury University in 1986 earning a Bachelor of Science Degree in Interior Design with a minor in Architecture History.

Company Profile

Ron Neal Lighting Design is an award winning San Diego based firm, founded in 2001 by architectural lighting designer, Ron Neal. Since its inception, Ron Neal Lighting Design has successfully participated in the completion of over 200 commercial and residential projects. We encourage an open dialogue between the user and design team, establishing a creative atmosphere in which the design process is a true collaboration of cost, function, technical expertise and artistic sensibility. This concept allows us to produce innovative and appropriate architectural lighting design solutions for a wide range of projects.

Our diverse experience makes us uniquely qualified to provide a full range of lighting design services. Our collective background includes professional, interior and architectural design, lighting manufacturer's representative, electrical contracting, construction administration, project management and custom fixture design. We are committed to designing lighting systems that are sustainable and environmentally responsible. Several of our recently completed projects have received LEED certification.

Our VISION is to produce innovative and appropriate lighting solutions. Artistic SENSITIVITY is an integral part of our lighting design process. We believe that TEAMWORK with all of the parties involved is essential.

Awards:

We are proud to have received the following awards for lighting design excellence:
